Notes to the Condensed Interim Consolidated Financial Statements

For the Nine Months Ended September 30, 2018 (Expressed in Canadian Dollars – Unaudited)

1. Nature of Operations

Calibre Mining Corp. (an Exploration Stage Company) is incorporated under the laws of British Columbia, Canada and maintains its corporate head office at Suite 413 - 595 Burrard Street, Vancouver, British Columbia, Canada. The Company's common shares are listed on the TSX Venture Exchange (TSX.V: CXB) in Canada.

Calibre Mining Corp. and its subsidiaries (collectively referred to as the "Company") are principally engaged in the acquisition, exploration and development of mineral properties located in Nicaragua.

2. Basis of Preparation and Statement of Compliance

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, including International Accounting Standards 34, *Interim Financial Reporting* ("IAS 34") as issued by the International Accounting Standards Board ("IASB").

The accounting policies applied in the preparation of these unaudited condensed interim consolidated financial statements are consistent with those applied and disclosed in the Company's audited consolidated financial statements for the year ended December 31, 2017, except as noted below. These unaudited condensed interim consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2017, which have been prepared in accordance with IFRS as issued by the IASB. These condensed interim consolidated financial statements were authorized for issue by the Audit Committee on November 14, 2018.

3. Significant Judgments, Estimates and Assumptions

The preparation of these financial statements in accordance with IFRS requires the Company to make assumptions, estimates and judgments that affect the reported amounts of assets, liabilities, and expenses, and the related disclosure of contingent assets and liabilities. The Company evaluates its estimates on an ongoing basis. Such estimates are based on historical experience and on various other assumptions that the Company believes are reasonable under the circumstances, and these estimates form the basis for making judgments about the carrying value of assets and liabilities and the reported amount of expenses that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. Significant areas of estimation uncertainty considered by management in preparing the financial statements are as follows:

Impairment of exploration and evaluation assets

The Company is required to review the carrying value of its exploration and evaluation properties for potential impairment when impairment indicators exist. Impairment exists when the carrying value of the Company's exploration and evaluation assets is not recoverable. If impairment is indicated, the amount by which the carrying value of exploration and evaluation assets exceeds their estimated fair value is charged to the statement of loss and comprehensive loss.

3. Significant Judgments, Estimates and Assumptions (cont'd.)

Evaluating for recoverability during the exploration and evaluation phase requires judgment in determining whether future economic benefits from future exploitation, sale or otherwise are likely. Evaluations may be more complex where activities have not reached a stage which permits a reasonable assessment of the existence of reserves or resources. Management must make certain estimates and assumptions about future events or circumstances including, but not limited to, the interpretation of geological, geophysical and seismic data, the Company's financial ability to continue exploration and evaluation activities, contractual issues with joint venture partners, the impact of government legislation and political stability in the region, and the impact of current and expected future metal prices to potential reserves.

4. Changes in Accounting Policies

Recently issued but not adopted accounting guidance are as follows:

IFRS 9, Financial Instruments ("IFRS 9"), addresses the classification, measurement and recognition of financial assets and financial liabilities. The complete version of IFRS 9 was issued in July 2014. It replaces the guidance in IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 retains but simplifies the mixed measurement model and establishes nine primary measurement categories for financial assets: amortized cost, fair value through other comprehensive income ("OCI") and FVTPL. There is now a new expected credit losses model that replaces the incurred loss impairment model used in IAS 39. For financial liabilities, there were no changes to classification and measurement except for the recognition of changes in own credit risk in OCI, for liabilities designated at FVTPL. The standard is effective for accounting periods beginning on or after January 1, 2018. The Company has adopted the standard and accordingly, the new standard had no impact to the Company's financial statements.

In January 2016, the IASB issued a new standard, IFRS 16, *Leases* ("IFRS 16"). This standard is effective for annual periods beginning on or after January 1, 2019, and permits early adoption, provided IFRS 15, has been applied, or is applied at the same date as IFRS 16. IFRS 16 requires lessees to recognize assets and liabilities for most leases. The Company is in the process of determining the impact of IFRS 16 on its consolidated financial statements.
